

## New illuminated Awnings

### Day Time

Keenlight is proud to announce its new distributorship for a range of Illuminated Awnings which are custom designed in a wide range of fabrics that fit on all types of blinds.

Ultra lightweight and delivered ready for installation, the blinds have unprecedented visibility, both day and night, whilst having the additional benefit of being Weatherproof.

A real alternative to the normal illuminated sign, they invigorate the shop's windows at a lower cost whilst enhancing the character of the business.

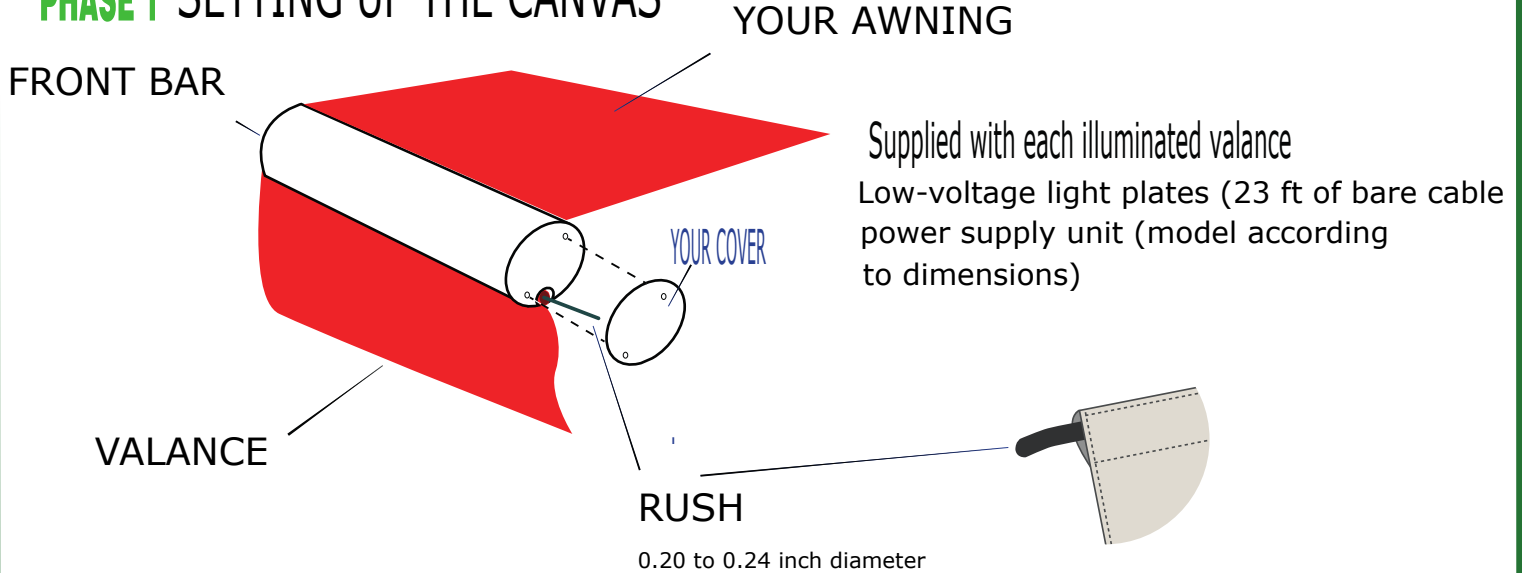

Our selected Contractors would install the fully sealed 12v machined product.

Reasons to choose Keenlight s' Illuminated Awnings

- \* Customized Manufacturing
- \* Cost Efficient High Performance Lighting
- \* A wide range of fabrics
- \* Guaranteed Production with a 1 year warranty
- \* Fast delivery times

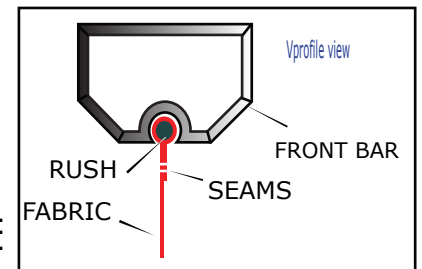

# HOW TO INSTALL A LIGHTED VALANCE

## PHASE 1 SETTING UP THE CANVAS

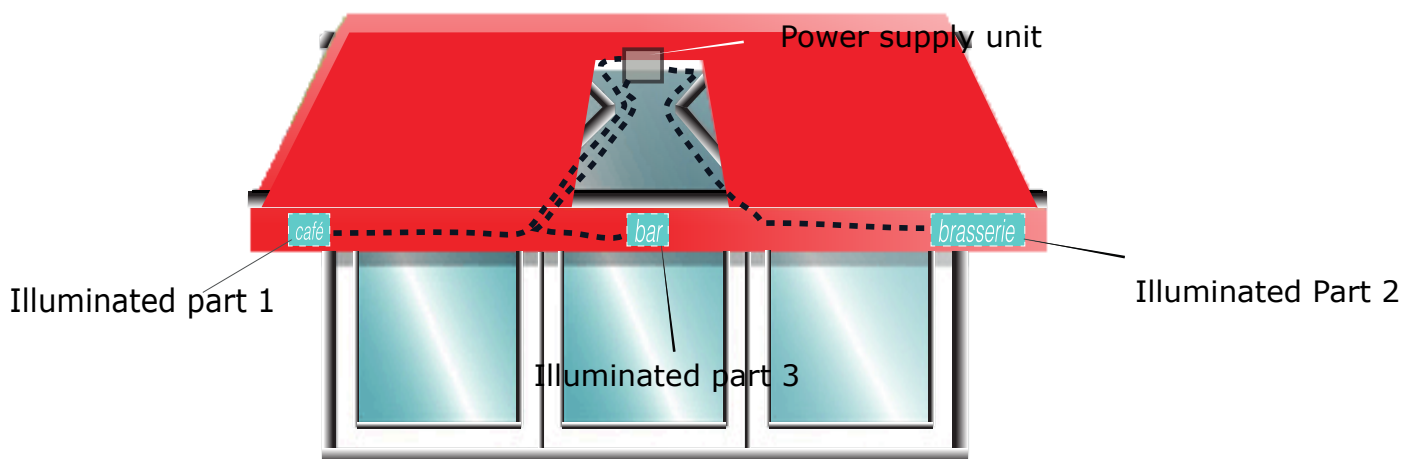

Unscrew the awning bar cover (profile at the end of the awning)  
Slide the fabric sleeve with the rush inserted .  
into it into the groove provided.

**BE CAREFUL** Do not tear the fabric at the seams when inserting into the profile..

## PHASE 2 ELECTRICAL CONNECTION OF THE PLATE

Connect in **PARALLELS** each plate with vagos or waterproof connectors to the power supply.

Connect the power supply to the mains supply  
Secure the cables on the arms of the awning, giving them some flexibility  
so as not to force them during the folding and opening movements of the awning.

**WARNING DO NOT MOVE SERIAL PLATES RISK OF POWER LOSS ON MOST Distant UNITS.**
